

Canvas

Virtual learning environment

Canvas is being implemented across each school and business unit of the Department of Education from January 2018. Canvas is a virtual learning environment, and will support us to engage in learning collaboratively and sharing our learning with an authentic and wide audience. It is accessible on any computer with internet access using your child's username and password.

Canvas is like the School Building. It is made up of many rooms, some of which will belong to our specialist teachers e.g. PE, Music and French and some that may be set up temporarily when needed e.g. Tournament of Minds. All classes will have their own room as well as accompanying grade curriculum rooms and gallery spaces.

More information will be made available to the community as Taroona Primary School staff develop their class and school Canvas pages to share with the community.
